Anchor device type B
Type: LUX-top® QUICKFIX II

16.2 Description

The anchor device, type: LUX-top® QUICKFIX II serves as a temporary single anchor point to protect a maximum of three persons against falls from a height (fig. 1).

The anchor device consists of two beam clamps ($t = 4 \text{ mm}$) that are freely displaceable on the threaded rod (M16) and can be locked by means of nuts.

The maximum clamping width is 200 mm. At one end there is an eyelet holder ($t = 6 \text{ mm}$) with a ring eyelet M16. This eyelet serves to accommodate the personal protective equipment against falls from a height. The fixation on the building is being realized by tensioning the anchor device by means of the hex nuts on the two beam clamps. The anchor device is intended for loads exerted from any direction and consists of corrosion resistant steel.
